East Nicolaus Bypass Opens to Traffic on Tuesday

East Nicolaus – The California Department of Transportation (Caltrans) is alerting motorists that beginning on Tuesday morning, the Nicolaus Avenue interchange and new alignment on State Highway 70 will be opened to traffic. This new interchange and alignment will bypass the town of East Nicolaus and eliminate the last stop sign between Sacramento and Marysville.

The \$84 million construction project, scheduled for completion in Spring 2011, will also construct a new bridge at the Bear River, widen and rehabilitate the existing two-lane Bear River Bridge, construct overpasses at Marcum Road and Cornelius Avenue and reconstruction the existing two-lane segment.

Caltrans urges motorists to use caution in this area and to "Slow for the Cone Zone".
